Summary

What's my purpose? To pass the butter! 😩 Modification of the great robot OTTO to pass butter, compatible with an MP3 !

Learning > Engineering

I'm sure you remember the famous robot from Rick and Morty? Well, today I brought it to life with this modification of the HP OTTO robot!

It's easy to assemble, and I've included the code so you can build it yourself, I'm sure you can do a much better job 😄

This is an excellent starting point for further modifications, so I've also included the STEP file!

Have fun with this mod!

Necessary Hardware

- M3 Hex Screws (some 5 and 8mm long)
- M4 Hex Screws (8, 10 and 12mm should work)
- 4x M4 Brake nuts (to block the wheels)
- The rest comes already with the OTTO kit !
- Ahh and maybe some wires or PLA to simulate the Robot cables

Model files

STL (remember to separate by objects) 12 files

arm-l.stl

Split to objects (print 1)

base-to-leg.stl

print 1

arm-r.stl

Split to objects (print 1)

head_upper.stl

print 1

leg.stl

print 1

head_front.stl

print 1

butter.stl

Split to objects (print 1)

led.stl

print 2

normal-wheel.stl

print 4

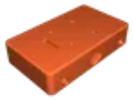

motor-wheel.stl

print 2

head_base.stl

print 1

motors-base.stl

Split to objects (print 1)

3MF (Almost ready to print files) 2 files

pass-the-butter_all-body.3mf

separated by colors

pass-the-butter_butter.3mf

STEP files (now is your turn to mod this robot) 2 files

otto-pass-the-butter_lite.step

without electronics (easier to open)

otto-pass-the-butter.step

with all the electronics (better for visualization/mods)
